Summary

Full Stack Software Engineer with 2.5+ years of experience building scalable SaaS platforms, real-time systems, and fintech applications. Skilled in Node.js, React.js, and React Native with strong expertise in API architecture, payment integrations, and high-performance mobile apps. Proven ability to deliver production-grade solutions with strong focus on scalability, performance, and user experience.

Experience

ScoreBoat AI Learning, Full Stack Developer

09/2025 – 05/2026 | Remote + In-office

- Built and deployed a full-stack SaaS platform using React (web), React Native (Android), and Node.js backend.
- Designed secure authentication system (JWT + OTP) with WhatsApp & SMS fallback and fraud prevention.
- Integrated Razorpay payments with webhook handling, verification, and subscription lifecycle management.
- Developed PDF invoice system using PDFKit with Unicode support, branding, and secure downloads.
- Built REST APIs using Node.js, Express, and MongoDB with optimized performance.
- Engineered centralized API layer (Axios) with auto-refresh token and error handling.
- Implemented global state management using Context API and Zustand.
- Developed mobile app using React Native with MMKV for high performance storage.

JustGetLeads Pvt. Ltd., Software Engineer

04/2025 – 08/2025 | Gurgaon, India

- Developed responsive web apps using React.js with optimized UI/UX.
- Built REST APIs with authentication and real-time updates.
- Implemented chat system using Socket.io (typing indicators, real-time messaging).
- Developed video/audio calling using WebRTC (1:1 and group).
- Designed scalable signaling servers for low-latency communication.
- Built mobile features using React Native.

Fi Elements Pvt. Ltd., Software Engineer

05/2024 – 03/2025 | Noida, India

- Led development of live streaming app using WebRTC and Socket.io.
- Built Node.js backend for real-time streaming and concurrent users.
- Developed React Native app (profiles, cart, wishlist).
- Integrated Razorpay payments and implemented Redux + AsyncStorage.
- Designed and consumed REST APIs for services and user interactions.

Ideaexecution Technologies Pvt. Ltd., Software Engineer

03/2023 – 04/2024 | Bhilai, India

- Built Android TV app using React Native with optimized performance.
- Developed fintech AEON Net Banking app (iOS & Android).
- Implemented secure APIs for authentication and transactions.
- Handled offline data storage using AsyncStorage.
- Optimized performance using lazy loading and native modules.

Projects

ScoreBoat, AI Powered Web & Mobile Application

Developed a full-stack SaaS platform for student exam preparation using AI-based question generation and learning tools.

GitHub: <https://github.com/nikhilSaini0210/AI-Learning-.git> 

Web: <https://scoreboat.com> 

JamRack, Live Streaming Application

Developed a real-time live streaming and video calling application using WebRTC and Socket.io enabling users to interact in real-time.

Store: https://play.google.com/store/apps/details?id=com.jamrack&pcampaignid=web_share 

Education

Bachelor of Engineering (CSE), Jaypee University Aanoopshahr

2015 – 2019 | Uttar Pradesh, India

Skills

Frontend: React.js | React Native | TailwindCSS |
JavaScript | Java

Backend: Node.js | Express.js | REST APIs |
MongoDB | Redis

Auth & Payments: JWT | OTP | Razorpay | Stripe |
Google/Facebook Login

Real-time: Socket.io | WebRTC

State & Storage: Redux | Zustand | Context API |
MMKV | AsyncStorage

Cloud & Tools: AWS | Firebase (Auth, FCM) | Git |
Bitbucket | Postman | Axios

Key Achievements

- **Built and deployed a production SaaS platform (ScoreBoat)** with payments integration, OTP authentication, and invoice system.
- **Developed real-time chat and video calling systems** using WebRTC and Socket.io, enabling low-latency communication.
- **Engineered a live streaming platform** capable of handling concurrent users with scalable Node.js backend.
- **Delivered a fintech mobile application (AEON Net Banking)** for international users with secure API integrations and transaction flows.
